Description

YXD-1AE - 240 Volt, 10 AMP Convectmax Convection Oven

This compact, heavy duty oven is built and serviced straight from our doors here at Federal Hospitality Equipment, along with many other high-quality ovens that have served other restaurants and cafes across Australia.

This convectmax oven cooks and heats your foods and ingredients flawlessly, whether your serving up a hot meal to customers or defrosting frozen foods from your freezer. This particular oven, while smaller, is far more compact and robust compared to most other ovens. Due to its size this oven can fit snugly within your kitchen without taking up too much space.

It comes with four aluminium trays, two powerful fans for cooling and features a wide range of heating levels.
